PROFESSIONAL SUMMARY

Full-stack developer with 4+ years shipping production web and mobile products end to end — from data model and API to deployed UI. Deep in the modern TypeScript/React/Next.js/Node ecosystem, with Python for backend and data work, and a track record of building scalable, real-time, AI-powered platforms.

SKILLS

Frontend: React, Next.js, React Native, Responsive design, Server-side rendering

Databases: PostgreSQL, MySQL, MongoDB

Backend and APIs: Node.js, Express, FastAPI, REST, gRPC

Testing and Quality: Jest, Vitest, MSW, Test-driven development

DevOps and Cloud: Docker, Dev containers, NX monorepo, GitLab CI/CD, Ansible, AWS

Tools and Practices: Git, Jira, Agile/Scrum

Messaging and Realtime: RabbitMQ

Auth and Security: OAuth 2.0, OpenID Connect

EXPERIENCE

FULL-STACK DEVELOPER, Ottawa

National Research Council (NRC), May 2023 – December 2025

- Delivered an end-to-end BIM-LCA platform for the National Research Council (NRC), from architecture through production deployment.
- Architected an event-driven ecosystem of seven microservices (Node.js, Python, Java) using gRPC and RabbitMQ for reliable asynchronous messaging.
- Eliminated cross-service integration bugs by centralizing shared types and validation (Zod) in a common library across an Nx monorepo, enforcing consistent schemas across every service.
- Enabled analysis of large-scale building models by parsing IFC files up to 2 GB in background jobs, leveraging streaming to efficiently process models exceeding available memory.
- Secured platform for production with OAuth 2.0 / OpenID Connect, a Key Management Service, and an API gateway for routing and HTTPS/TLS.
- Reduced deployment friction and enhanced reliability by containerizing services with Docker and Dev Containers.
- Built an automated testing suite with Jest, achieving 83%+ code coverage and catching regressions before release.

FULL-STACK DEVELOPER, Tehran

Viratarhe Farda Co., January 2022 – August 2022

- Created RESTful APIs using Node.js with Express framework for data manipulation.
- Developed and maintained front-end web applications using Tailwind CSS, JavaScript, React.js, and Redux.
- Collaborated with designers to create intuitive user interfaces for both mobile and desktop platforms.
- Developed reusable components for cross-project use, streamlining development workflows.
- Engineered MySQL database tables and queries for core application features while optimizing slow queries through indexing and refactoring.
- Managed source control repositories with Git, including branching strategies and pull requests.
- Constructed a GitLab CI/CD pipeline for application containerization using Docker, automating configuration and deployment with Ansible for faster release cycles.

FULL-STACK DEVELOPER, Tehran

Fotros Tourist Agency, August 2020 – January 2021

- Developed responsive front-end web applications with React.js, JavaScript, HTML, and CSS (Bootstrap), utilizing the Context API for state management to enhance user experience.
- Developed RESTful APIs with Node.js and Express for data operations across client applications.
- Deployed web applications to Linux servers with Nginx as a reverse proxy, ensuring reliable performance and accessibility.
- Managed source control with Git, applying branching strategies and pull request workflows for team collaboration.

EDUCATION

PHD IN ENGINEERING, Ottawa, ON, Canada

PROJECTS

- **Meet AI – AI-Powered Video Meeting Platform**, [meet-ai.rosnik.dev](#), [github.com/rrosnik/meet-ai](#). Full-stack AI SaaS for custom AI agents that join live video calls, with auto-recording, transcription, and AI summaries. Next.js, TypeScript, Stream, OpenAI, Inngest, Neon/Drizzle, Polar
- **Co Draft – Real-Time Collaborative Workspace**, [co-draft.rosnik.dev](#), [github.com/rrosnik/co-draft](#). Multiplayer workspace with live-cursor editing, shared whiteboards, and rich-text collaboration. Next.js, Liveblocks, TipTap, Convex, Clerk
- **Acquisitions – Dockerized Node/Express REST API**, [github.com/rrosnik/acquisitions](#). Production-ready, Dockerized REST API with JWT/bcrypt auth, Zod validation, and Neon Postgres/Drizzle ORM; hardened with Arcjet/Helmet/CORS, tested with Jest/Supertest.
- **Recurrly – Subscription Tracker Mobile App**, [github.com/rrosnik/react-native-recurrly](#). Cross-platform app for tracking subscriptions and payments, offline-first with on-device SQLite. React Native/Expo, Drizzle, Clerk, PostHog
