

Reza Rostaminikoo

Full-Stack Developer

Full-stack developer with 4+ years shipping production web and mobile products end to end — from data model and API to deployed UI. Deep across the modern TypeScript/React/Node ecosystem, with a track record of turning ambitious ideas into scalable, real-time, AI-powered platforms.

RELEVANT WORK EXPERIENCE

National Research Council (NRC), Ottawa, Canada

The Government of Canada's largest federal research and development organization

Full-Stack Developer

05/2023 – 12/2025

- **Delivered** an end-to-end BIM–LCA platform for the NRC — owning architecture through deployment — giving researchers one tool to model buildings' environmental impact.
- **Eliminated cross-service integration bugs** by centralizing types and validation (Zod) in a shared library across a scalable Nx monorepo, enforcing consistent schemas everywhere.
- **Enabled reliable communication at scale** by architecting an event-driven microservices ecosystem (Node.js, Python, Java) with gRPC and RabbitMQ for asynchronous messaging.
- **Hardened the platform for production** with OAuth 2.0 / OpenID Connect, a Key Management Service, and an API gateway handling routing, HTTPS/TLS, and large-file streaming.
- **Cut deployment friction and improved reliability** by containerizing every service with Docker and Dev Containers and adding automated testing (Jest/Vitest) and linting.

Viratarhe Farda Co., Tehran, Iran

Software development company

Full-Stack Developer

01/2022 – 08/2022

- **Drove a stalled web app from 10% to 55% completion** after joining, unblocking delivery while mentoring junior developers through code reviews and technical guidance.
- **Shipped the product end to end** — architected the backend and REST APIs (Laravel/PHP, MySQL) and built the React.js front end.
- **Reduced release friction** by establishing a GitLab CI/CD pipeline, Dockerizing applications, and automating configuration and deployment with Ansible.

Fotros Tourist Agency, Tehran, Iran

Travel and tourism agency

Full-Stack Developer

08/2020 – 01/2021

- **Built the agency's web platform backend** from the ground up — architecture and REST APIs in Laravel/PHP and MySQL.
- **Delivered responsive front-end features** (HTML, CSS, JavaScript) and raised code quality through peer code reviews.

PROJECTS

Meet AI — AI-Powered Video Meeting Platform

Live: [meet-ai.rosnik.dev](#) • Code: [github.com/rrosnik/meet-ai](#)

- **Full-stack AI SaaS** for custom AI agents that join live video calls, with auto-recording, transcription, and AI summaries. (Next.js, TypeScript, Stream, OpenAI, Inngest, Neon/Drizzle, Polar)

Co Draft — Real-Time Collaborative Workspace

Live: [co-draft.rosnik.dev](#) • Code: [github.com/rrosnik/co-draft](#)

- **Multiplayer workspace** with live-cursor editing, shared whiteboards, and rich-text collaboration. (Next.js, Liveblocks, TipTap, Convex, Clerk)

Acquisitions — Dockerized Node/Express REST API

Code: [github.com/rrosnik/acquisitions](#)

- **Production-ready, Dockerized REST API** with JWT/bcrypt auth, Zod validation, and Neon Postgres/Drizzle ORM; hardened with Arcjet/Helmet/CORS, tested with Jest/Supertest.

Recurrly — Subscription Tracker Mobile App

Code: [github.com/rrosnik/react-native-recurrly](#)

- **Cross-platform app** for tracking subscriptions and payments, offline-first with on-device SQLite. (React Native/Expo, Drizzle, Clerk, PostHog)

SKILLS

Languages

- TypeScript / JavaScript
- Python, Java
- SQL

Frontend

- React, Next.js
- React Native (Expo)
- Redux Toolkit, Zustand, TanStack Query
- Tailwind CSS, shadcn/ui

Backend & Architecture

- Node.js, Express, tRPC
- REST APIs, gRPC
- Event-driven microservices

Data & Real-Time

- PostgreSQL, MySQL, MongoDB
- Drizzle ORM, Convex
- RabbitMQ, Redis, Liveblocks

DevOps & Testing

- Docker, Dev Containers, Nx
- GitLab CI/CD, Ansible
- Jest / Vitest, Storybook, MSW

AI & Auth

- OpenAI (agents, transcription)
- OAuth 2.0 / OIDC, JWT, Clerk

EDUCATION

University of Ottawa

Ottawa • 2022-current

OTHER

- English (Fluent)
- Persian (Native)
